Forecast for Tuesday 03 May 2022

Weather: A mostly cloudy day with occasional light rain or drizzle through the morning. A few cloud breaks developing during the afternoon, but equally there will also be a scattering of showers too. Becoming mostly dry by late in the evening.

Chance of cloud-free hill tops above 800m: 20% until mid-morning, becoming 70% for a time through the afternoon, dropping to 20% again after dusk.

Low Cloud and visibility: Occasional to broken cloud above 400 metres, especially in the east, until mid-morning, becoming occasional patches above 700 metres through the afternoon, mainly in association with any drizzle or showers. Some summits should be clear, at least at times. Bases lowering from the west after dusk with extensive cloud above 200 metres, especially around western hills.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Winds are expected to be variable, so please do not take the data in the table above literally. Cloud amounts and bases also somewhat variable and may well be dependent on extent and persistent of precipitation as much as anything else.

Forecast for Wednesday 04 May 2022

Weather: Occasional rain and drizzle through the morning, giving way to sunshine and scattered showers. Somewhat breezier.

Maximum wind: Westerly veering northwesterly, 25 mph.

Chance of cloud-free hill tops above 800m: <10% until mid-morning, becoming 90% by mid-afternoon.

Low Cloud and visibility: Extensive cloud above 400 metres until mid-morning, with patches to 200 metres or below on some western slopes. Bases improving markedly by mid-afternoon to above 900 metres, with just occasional patches affecting the highest summits. Good visibility outside of cloud once the front clears east.

Temperature: **Valleys:** Plus 7 Celsius becoming plus 15 Celsius.
At 800m: Plus 6 Celsius.
Freezing level: Well above the summits.
